## DRG200 Industrial Dryer

### DRG200

|                            |   |
|----------------------------|---|
| Capacity (Wet)             | 91 kg   |
| Volume                     | 1656 L  |
| Drum Diameter              | 1289 mm   |
| Net Weight                 | 790 kg  |
| Water (C.A.R.E)            | 1x Standard Cold Washing Machine Water Tap at 1.6m off Floor                |
| Electricity                | 415 Volt – 50 hZ  |
| Electrical Recommendations | Three Phase Isolating Switch, 15 Amp Individual Circuit Required            |
| Gas Connection             | 25.4 mm Gas Isolating Cock  |
| Gas Heating                | 448 MJ/h  |
| Gas Pressure               | Min = 1.13kPa Rec = 1.62kPa Max = 2.61kPa                                   |
| Flue Diameter              | Ø 305 mm  |
| Exhaust Flow Rate (50khz)  | 1156 L/s  |
| Flue Termination           | 2 x 90° Bends terminating 500mm from roof line – No Mesh or Chinaman's Hats |

**\*Please allow a 25mm gap on sides and a 100mm gap on top if dryer is to be built into an enclosed space.**
